

OBJECTIVES

At the end of this training, participants will be able to:

- 1) *describe several strategies to identify underlying mental illness during an intake/admission assessment*
- 2) *conduct a medication history and assess for potential drug-drug interactions between commonly prescribed tuberculosis and psychoactive medications*
- 3) *describe 3 common stressors for patients with a mental health disorder when diagnosed with tuberculosis*
- 4) *identify 2 community resource partners to assist in management of mental illness*
- 5) *apply knowledge gained to support and improve outcomes of patients with tuberculosis and mental health diagnoses*
