

# **THINK TB**

## **FOR SHELTER GUESTS**

- ➡ Tuberculosis is spread by tiny germs that can float in the air
- ➡ TB germs may spray into the air if a person with TB disease coughs, shouts or sneezes
- ➡ If TB germs cause TB disease, the person needs medical help
- ➡ If you have TB you may: feel weak, cough a lot, cough up blood, have chest pain when you cough, lose your appetite, lose weight, have a fever, or sweat a lot at night
- ➡ Only a doctor can tell you if you have TB disease
- ➡ Staff at this center can help you get a TB test
- ➡ TB tests are free and confidential
- ➡ TB is preventable and if you already have it, it can be cured
